#### **Project Description (brief):**

Implement an algorithm that monitors in real time the location properties in Android devices. The monitoring system must be decentralized so that the devices can construct & manage the network themselves.

Will any special hardware or any commercial software licenses be required? If so please identify the owner (name and address) of the hardware and / or software licenses.

Yes - please contact CAS Supervisor for details

<sup>1</sup> If there is more than one, please include the same information for the additional participants on a separate sheet.
